COMMUNITY PROGRAMME

At SWFCCP, we will structure our provision to cover content related to the Fitness/Health/Sport industry, with a specific focus on football for engagement purposes.

We will use the power of football and the brand of SWFC to re-engage learners in education.

Maths, English and science will be linked through educational studies revolving around the sport. i.e. the maths involved in transfer fees of footballers, maths involved in FIFA cards and Geography of stadiums around the world.

SWFCCP will look to develop learners' personal, social, and mental health through content which actively targets specific development of these areas, allowing learners to make the developments required to re-integrate into mainstream education, where feasible.
